

Muhammad Talal Aqdas

Software Engineering Student • NUST

PROFILE

BS Software Engineering student at NUST (BESE-16B) building real-world software and AI-orchestrated tools, running a part-time coaching centre, and interning across AI, marketing, and admin tracks. Seeking a software engineering or AI-focused internship.

EXPERIENCE

AI Marketing & Fluency Intern

FlyRank | Remote

- ▶ Working across two tracks — AI Marketing (client and portfolio deliverables) and AI Fluency (Anthropic Academy coursework and applied prompt engineering)
- ▶ Applied Claude to real marketing and workflow tasks, translating coursework into production-ready outputs

Virtual Assistant Intern

GAO Tek Inc. | Remote

- ▶ Provide remote administrative and research support, coordinating tasks and organising documentation across projects
- ▶ Balance internship deliverables alongside coursework and other commitments, maintaining consistent turnaround on assigned tasks

Coaching Centre Operator & Tutor

Self-Employed | Gulberg Residencia, Islamabad

- ▶ Founded and operate a part-time coaching centre independently at 19 — managing scheduling, curriculum, finances, and student sessions
- ▶ Created custom HTML/CSS learning notes and files used as digital study material for students, bridging teaching with technical skills
- ▶ Mentor students in core academic subjects, tracking individual progress and adapting teaching approach per student

PROJECTS

NEXORA — AI Website-Generation Platform

Personal Project | React, Vite, TypeScript, Node.js

- ▶ Built an orchestrator that coordinates multiple AI models (Claude, Gemini, Codex, Groq, Ollama, OpenRouter) to plan, design, code, review, and deploy websites from a single prompt
- ▶ Designed a live orchestration interface with real-time build preview and analytics, evolved through several rounds of feature iteration

QuizPilot — Windows Study Assistant

Personal Project | Python, PySide6, SQLite

- ▶ Built a desktop study assistant combining screen capture, Tesseract OCR, and auto-clicking with SQLite-backed storage
- ▶ Designed a six-layer free AI fallback chain (Ollama → Groq → OpenRouter → HuggingFace → rule-based → auto-select) for reliable offline-first operation

CityLink — Transport Management System (C++)

FOCP Semester Project | Team: Talal Aqdas & Sarim Farooq Khan

- ▶ Built a full Windows console application simulating a city-wide transit network: passenger booking, driver assignment, route management, and an admin dashboard

EDUCATION

BS Software Engineering — NUST, Islamabad

BESE-16B | FOCP, OOP, Data Structures, Discrete Mathematics

ACHIEVEMENTS & RECOGNITION

- ▶ Top Performer — Federal Board Annual Examinations, 2023
- ▶ Founded own coaching centre at age 19 while pursuing a full degree at NUST — Campus Ambassador, Topline Studies
- ▶ Netacademy certified: HTML/CSS, UI/UX, Cybersecurity, Modern AI

TECHNICAL SKILLS

- › C++ — OOP & Data Structures
- › File I/O & System Design
- › HTML5 & CSS3
- › UI/UX Design Principles
- › JavaScript (Foundations)
- › Git & GitHub
- › Code Optimisation
- › Problem-Solving
- › Prompt Engineering & AI Fluency
- › Multi-Model AI Orchestration (Claude, Gemini, Groq)
- › Python & PySide6
- › React, TypeScript & Node.js

CERTIFICATIONS

HTML & CSS — Netacademy
UI/UX Design — Netacademy
Modern AI — Netacademy
Cybersecurity — Netacademy
AI Fluency — Anthropic Academy
Prompt Engineering — Anthropic

LANGUAGES

Urdu — Native
English — Professional
Punjabi — Native

INTERESTS

- › Cricket & Photography
- › Cooking
- › Continuous Learning
